## Award-Winning Care

We are accredited by The Joint Commission, the nation's leading healthcare accrediting agency, which reflects our commitment to providing the safest and most effective care possible.

We are the first acute rehabilitation facility in a five-state area to be accredited for our comprehensive, integrated inpatient rehabilitation programs by the Commission on Accreditation of Rehabilitation Facilities (CARF).

# Brain Injury Rehabilitation

**Responsive:** Our patients are welcomed into our hospital care as soon as possible after their injury or illness.

■ Regional average days until care  
■ AHC Rehab average days until care

**Balanced:** We understand the complexities that both men and women face in their rehabilitation.

Traumatic: 57% male, 43% female  
Non-traumatic: 40% male, 60% female

**Effective:** Our patients achieve their goals in a short length of time so they can return home faster.

■ Regional average days of stay  
■ AHC Rehab average days of stay

**Results-oriented:** In order to ensure the best outcomes, we measure how much each patient has improved each day. Our patients' daily improvement is among the highest in the region.

**14%** higher daily improvement than the average regional patient

**Personalized:** We treated patients ranging from 24 to 98 years of age in our brain injury program, with the average being 70 years of age for our brain injury patients.

**Compassionate:** Our patients consistently report positive satisfaction ratings about our hospital and care to an independent auditor.

**Customized:** Our patients receive intensive rehabilitation therapy. Our brain injury patients on average participated in 15.4 hours of therapy a week.

**Successful:** More than 75% of our patients returned to their home after leaving our hospital.

Some patients' needs were best met by other support, including care in an acute-care hospital or in a skilled nursing facility.
